V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>1-189</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-189</u>	NO
Industrial Applicability (IA)	Claims <u>1-189</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations

Claims 1-189 lack an inventive step under PCT Article 33(3) as being obvious over Hendricks (WO 95 15649) in view of Barney et al. (US 5,841,426).

Considering claims 1, 130 and 144, Hendricks discloses a method and corresponding apparatus for encrypting electronic books for delivery between two or more parties and comprising:

- a) supplying electronic book (pages 6-8);
- b) supplying encrypted electronic book (see the entire document including but not limited to page 8, lines 32-34, page 10, lines 9-14, page 11, lines 3-11, figures 3 & 4); and
- c) decrypting the encrypted electronic book (page 19, line 30 and figure 12, step 832).

However, Hendricks fails to specifically disclose encrypting and decrypting keys as recited in the claims.

Barney discloses various types of encryption and decryption keys and techniques for providing secure communication between a central facility and terminals. See the entire document including but not limited to figures 1-3 and the corresponding text.

It would have been obvious to one of ordinary skill in the art to modify Hendricks' system to include encryption and decryption keys, as taught by Barney, for the advantage of providing secure communication between a central facility and terminals.

Claims 2-129, 131-143 and 145-189 are met by the combined systems of Hendricks and Barney, wherein Hendricks discloses the detail features of the electronic book and Barney discloses the details and various types of encryption/decryption techniques.
